Concept – Solar Power Supply

## CONTACT:

**MADANMOHAN CHAWLA**  
 Advisor and Risk Partner  
 (Ontario / USA and India)  
 Cell: (416) 605-1518

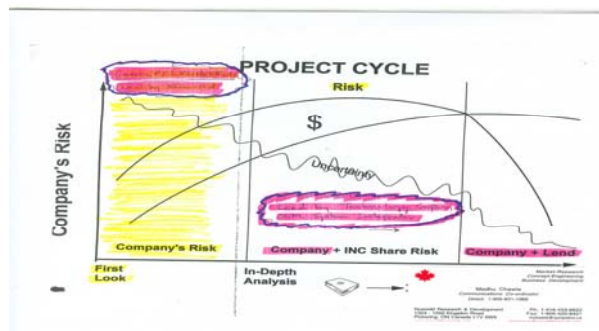

## First Look to Captive Opportunities and Partnership Development

### STEP -1: First Look to Captive Opportunities:

First look is an introduction to potential opportunities and process management requirements (concept and financial engineering), while collecting infrastructure data, Government incentives (and programs) and developing unconventional methods for continuous participation in local opportunities. First look to Concept engineering is lead by Nuworld, funded by beneficiaries - Technology and Risk partners (such as *Developers, Entrepreneurs, Investors, Financiers, Systems Integrators, OEM etc.*)

Concept engineering includes a due-diligence (technical and economical feasibility) while creating *captive opportunities* for the beneficiaries; risk Partners and MMC Ontario (an investment holding company).

**IF YOU ARE READY? - SKIP STEP -2  
 IN-DEPTH ANALYSIS FOR PARTNERSHIP DEVELOPMENT AND  
 GO TO STEP -3, COMMERCIAL FINANCING.**

### STEP - 2: In-depth Analysis for Partnership Development

In-depth Analysis is lead by Systems Integrators (OEM, Manufacturers or Technology partners) supported by risk partner with cost sharing with risk partners. We provide process management support services to technology and risk partners, market intelligence, while developing investment options and unconventional market entry methods for go or no-go scenarios. We verify the technical and economical feasibility of opportunities for the beneficiaries, risk partners and MMC Ontario (an investment holding company).

### STEP - 3: Commercial Financing

Commercial Financing is lead by System Integrator, Manufacturer or risk partner (supported by technology company) while 50 - 75% of sales are financed by IFI, EDC and commercial banks. Commercial financing is subject to financial strength of the buyers. We provide process management support services to technology and risk partners.

**Growing power.**

## SERVICES

To ensure success we stay involved from first look to captive opportunities and partnership development i.e. idea discussions to market research, market entry methods, concept engineering (first look to in-depth analysis for partnership development), sales and service channels, team building, project development and commercial financing.

### 1. Risk Partners:

We offer a due-diligence (technical and economical feasibility) while creating captive opportunities for the beneficiaries; risk Partners and MMC Ontario (an investment holding company). We bridge identified gaps to add capacity while gathering infrastructure data to develop a long-term corporate growth plan.

### 2. Captive Opportunities:

- **Solar and Hybrid for e-governance**
  - a. 300-Watt Solar Power Supply for Kiosks (over 5000) in pipeline for the year 2007 – each kiosk need 300-Watt solar power supply.
  - b. Stand Alone solar power supply systems 650 Watts – 2 KWP
  - c. **Community needs:** Solar (and hybrid i.e. Geothermal, wind, bio-mass, manure to electricity etc.)
- **Research Projects:**
  - 2007-08 Ag-Waste and manure to electricity.
  - 2007-09 Coal Bed Methane to electricity

### 3. Leads Flow:

We introduce risk partners (technology companies, system integrators and manufacturers) to Local market through our network of risk partners to add capacity, while Gathering infrastructure data to prepare a long-term corporate development plan. We promote contractors products and services, as part of our participation (or presentations) in the following:

- a. Trade and Investment Missions
- b. International Business Forum
- c. Conferences and Trade Shows
- d. Field Trips
- e. Internet based e-marketing through Hyper-linked websites
- f. Email Alerts
- g. e-News
