OPPORTUNITIES - ARE YOU READY?

Solar and Hybrid would introduce a clean energy source that reduces local pollution and emissions of greenhouse gases. Solar Power Supply can provide sustainable power to Common Service Centres (CSC) for rural and village electrification, "e-Krishi" and other e-Governance programs. World Bank is providing further funding for a range of e-governance initiatives in India as part of the first phase of National e-Governance Plan (NeGP). The Government will give Internet access free and over 300,000 villages need electricity to link with Internet.

Triple Convergence

Solar Power Supply: A Proof of Concept has been completed in Ontario. Currently our risk partners are in the process to install a proof of concept in the following cities in India:

1. Ranchi, Jharkhand (Mr. Bankat Garodia)
2. Surat, Gujrat (Mr. Sandeep Monga)
3. Chandigarh, Punjab (or Simla, Himachal Pradesh)
4. Delhi (Gurgaon, Haryana or Jaipur, Rajashthan)
5. Hyderabad, Andhra Pradesh (or Bangalore)

At present, we are collecting field and infrastructure data such as Indian Government incentives and programs, freight, import duty, taxes, installation, infrastructure difficulties etc. etc. Collected Data will used for an India focused process transfer plan, resulting long-term profitable opportunities for risk partners.

RISK PARTNERS

Our mission is to help our clients pay less for energy, and assure reliable, high quality power while saving environment and earning carbon credits.

For, Process Management -
Concept and Financial Engineering

MADANMOHAN CHAWLA
 Advisor and Risk Partner
 (Ontario / USA and India)
 Cell: (416) 605-1518

We provide technical development and support services associated with efficient energy conversion of hydrocarbon-based fuels and heat into electric power. Our unconventional market entry methods help developers, manufacturers and systems integrators to enter *new markets* and *participate in local opportunities*. We develop and execute strategic marketing programs and channel opportunities through risk partners' sales and after sales service network.

We verify the technical and economical viability of investment opportunities for the risk partners and MMC Ontario (an investment holding company). Our primary focus is **clean energy sources that reduce local pollution and emissions of greenhouse gases**. MMC invests in technology companies, secondary tier of manufacturers & system integrators (generally small to medium size businesses (SMB)), who wish to be a technology partner in a "proof of concept" site in Ontario, while being nurtured as an **India focused Anchor Company**.
